## **PRODUCT DESCRIPTION**

We all enjoy sitting around a roaring fire and the Fuel Wood Pellets, which are Russian sourced, are the perfect fuel for the job.

The pellets are approximately 6mm in diameter and are made from natural 100% Russian pine and spruce Wood and are easy to manage. They are easily lit, clean to use and create amazing heat. There is little ash residue from the pellets which means less mess to clear up afterwards. The pellets are suitable for pellet boilers and multi-fuel stoves.

its impressive performance, amazing heat and a great value alternative to other fire starters
